J/109 - 4th Vitesse

NYYC 42 ESMERALDA Wins Debut in IRC!

The debut of the new Esmeralda, Hull #2 of the NYYC Club Swan 42 was extremely successful. We were able to log a great deal of very useful data which will be used to refine calibration information, develop more accurate polars & aid in sail development. The refinement process is ongoing and we will release updates to all Ockam clients as soon as they are released.

Hissar Fights A Hard Fought Battle In IRC 1

Edgar Cato's Farr 60 Hissar had a great battle on their hands all week in IRC 1. They ended up a close second to their rival Numbers. It came down to the last day of racing to decide the victor. Congratulations to the entire crew of Hissar on their performance.

T1 Internal Data Logging Is Well Received!

The latest version of Tryad processor software has taken yet another innovative leap forward in sailing instrumentation. Now you can log all of your instrument data with out having a PC connected to the system. The T1 stores the log files on the internal CompactFlash card to be downloaded post racing.
