

**OCKAM**  
INSTRUMENTS, INC.

**Introducing OckamSoft 5**

# New Features

- Robust support for receiving and transmitting instrument data over Ethernet and Internet
- Integrates Ockam's proprietary DeWiggler automatic calibration program
- Own the start with the new Starting Line screen
- Integrate images from the web, such as weather, into your standard complement of information
- Includes SailPlan for sail selection and management
- Supports live connection to remote experts for coaching and assistance

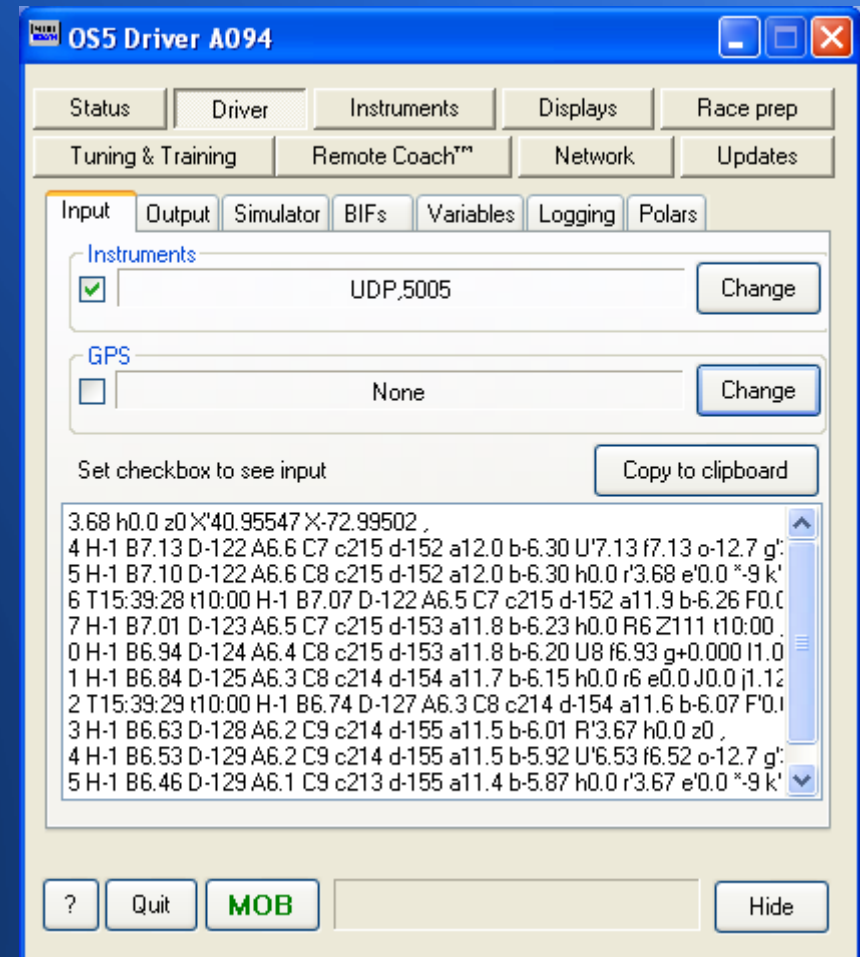

# Enhanced Features

- OS5 can accept separate GPS input for enhanced precision with a high-speed GPS
- Racecourse uses freely-available charts with available automatic update and population
- Course marks may be managed through the driver for pre-race preparation
- Numeric displays on the PC can be color-coded
- Import and export multiple polars
- Automatic program updates available
- System configuration and errors parsed into human-readable information

# Network connectivity

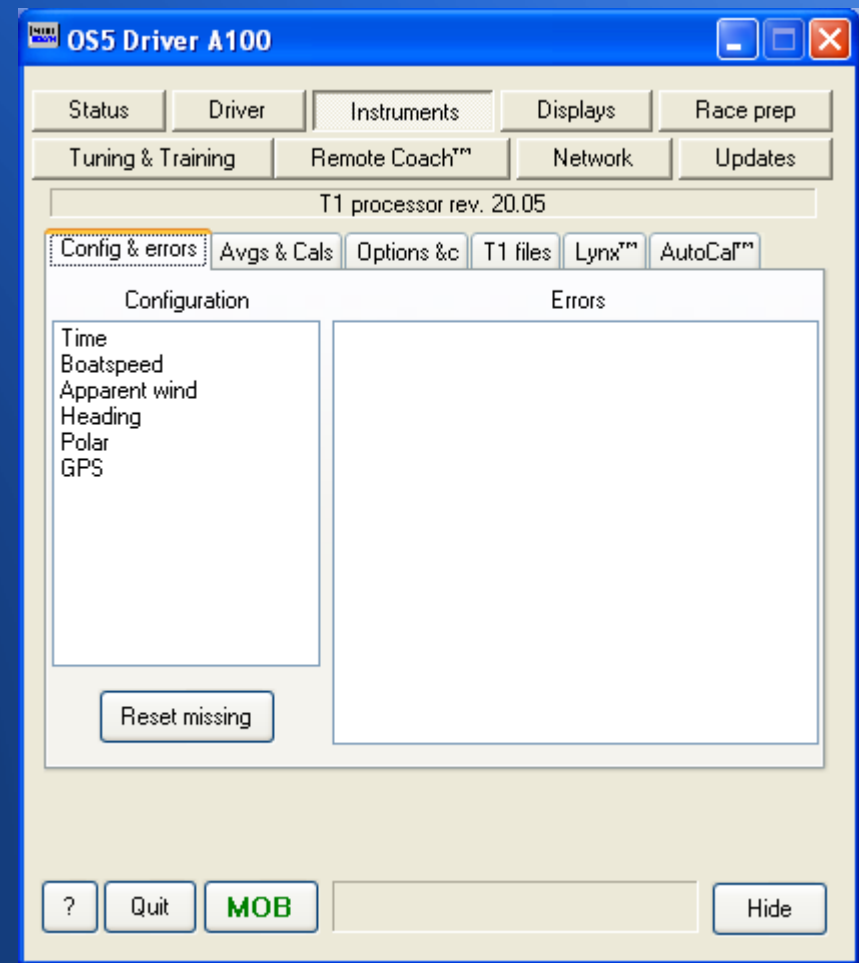

- OS5 can accept data from local and remote sources
- OS5 can send data out over a LAN or over the Internet
- Connection to Internet uses cell modem or Wi-Fi

# Configuration & Errors

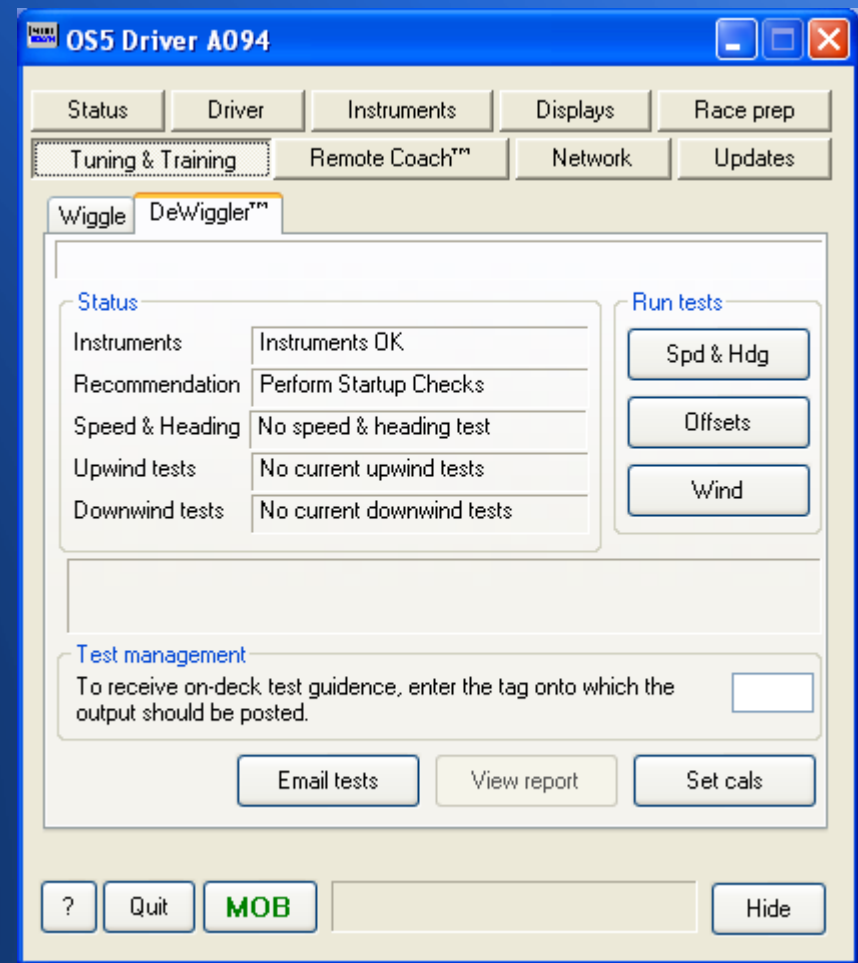

- System configuration number is parsed into a list of interfaces for ease-of-use
- System errors are parsed into phrases rather than just numerals, making troubleshooting easier

# DeWiggler

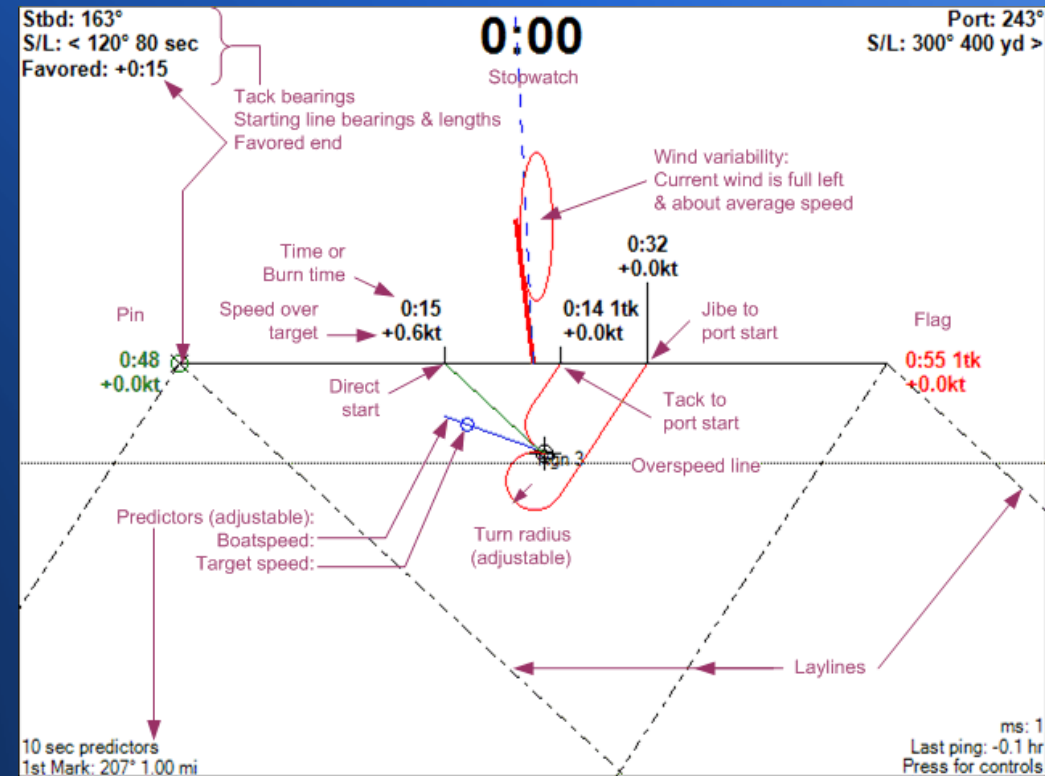

- Ockam's proprietary automated calibration program
- Guides user through required tests
- Can be used to build correction tables for the T1 processor

# Starting Line

- Easily find the favored end
- Hit the line perfectly at the gun
- Cross the line carrying extra speed
- Multiple simultaneous solutions

# Available NOW!
